

Writing the 2014 NEEAP

Laurence CHEYROU

Policy Officer

Directorate General for Energy and Climate, Ministry of ecology

Summary

- Calendar
- Updating the description of policies and measures
- Writing the new parts of the NEEAP
- Evaluations

Calendar

- October 2013 : Kick-off meeting to launch the writing of the NEEAP
- Autumn 2013 : exchange with the relevant public stakeholders to ask them for input
- End of December 2013 : first draft of the whole document available, written by the Directorate General for Energy and Climate, in collaboration with other ministries
- January : review of the first draft, by relevant stakeholders
- February-March : validation process : within the Directorate General, within the ministry of ecology, then at Prime Minister level (consulting all the other ministries)
- Before 30 April 2014 : submission of the NEEAP to the European Commission

Updating the description of policies and measures

We will use all collected data from :

- The 2011 NEEAP
- The 2013 Report under the Monitoring Mechanism Decision (280/2004/EC - about climate policy)

Sectoral parts already existing in the NEEAP will need to be updated with the latest data, and the latest announces of new measures.

Writing the new parts of the NEEAP

- Primary energy measures : need to involve new stakeholders
- National building strategy and public buildings : document under elaboration with the ministry of housing
- Energy services study : lack of data, a study has been launched by the ADEME to get a more precise knowledge of the market

Evaluations

We plan to use the same methodologies as in the 2011 NEEAP

- ESD target : use of the TD EC recommended indicators to calculate the progress towards the 2016 target
- BU evaluations : use of an internal tool « Sceges » to estimate the impact of the most important measures, through stock modelling
- Energy consumption in 2020 : use of the prospective scenarios that have helped us to set our 2020 EED target
- Annual report data : work with the statistical office of the ministry

Thank you for your attention
