

# D9: EED implementation in Slovenia

## Legal context

Ministry of Infrastructure and Spatial Planning, Directorate for Energy, is responsible for EED implementation.

## Status of the implementation

EED will be transposed mainly with the new Energy Act, named EZ-1, which is coming to act at the end of March 2014.

Details on legal transposition will be done soon.

## Additional efforts

At the moment secondary legislation for Article 5, 7 and 8 is in preparation. Beside we strongly work on Operational Programme for Cohesion Funds for 2014-2020 where focus is on supporting energy refurbishment of public buildings. Also the EE action plan is in preparation.

## Future planning

Next year secondary legislation for implementation of Article 14, 15 and 10 will be prepared. Focus will be also on establishing financial mechanisms to incentivise energy refurbishment of buildings in the frame of cohesion funds.
