

REGIO1ST

Implementing the Energy Efficiency First Principle in Regional Planning

Co-funded by the European Union under project ID101076088. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or CINEA. Neither the European Union nor the granting authority can be held responsible for them.

Objectives

-  Provide **decision-support** for regional authorities to apply the EE1st principle in their energy-related planning practices
-  Establish a **community of practice** for EE1st to ensure political commitment and societal acceptance through co-development of energy related scenarios
-  Support the introduction or strengthening of EE1st in the revision of **National Energy and Climate Plans, Regional Operational Programs** and foster the enforcement of **Multilevel Climate and Energy Dialogues**

Scope

Regio1st directly addresses **six regions**, and indirectly targets 100 additional regional and 120 additional local agencies and authorities through knowledge exchange and capacity building.

These regions have been chosen since they are in **delicate planning phases** and are facing various investment choices. They will implement and test the Regio1st framework and will then showcase to other regions how they embedded the EE1st principle.
